* Please seek professional counseling immediately!

Individuals with three symptoms or more **should be** in therapy.

Look carefully at the symptoms that trouble you the most. Intense and/or frequent experiences which cause a disruption in your life should alert you to the need for PSYCHOTHERAPY.

Depression is the nation's number one illness. It has been estimated that 1 in

50 is hospitalized, and 1 in 100 commits suicide. 25% of the population is in distress, 2% is in therapy.

If you or someone you know is having these symptoms and would like help, please call Kenn I. Hicks for a free psychotherapy evaluation. Mr. Hicks is available for Telephone Counseling, In-House Counseling, and Traditional Office Psychotherapy. Often the person who needs help is either too ashamed/afraid to call. Please call for them so they can receive help.
